The Carmel River Watershed Council and Conservancy (CRWC)

The CRWC is a non-profit, community-based organization founded in 1996 and built on a commitment to protect the rights of Stakeholders in the Carmel River Watershed. The CRWC’s primary commitment is protection of the natural resources that form the Carmel River watershed. The most important issues identified by the public outreach include water quality and quantity, riparian habitat for native species, erosion, sediment transport, infiltration and runoff, and biodiversity. The CRWC is dedicated to providing education, technical assistance, and support to the community.
